### Test results of Steyr Scout with OBserver Mock Suppressor

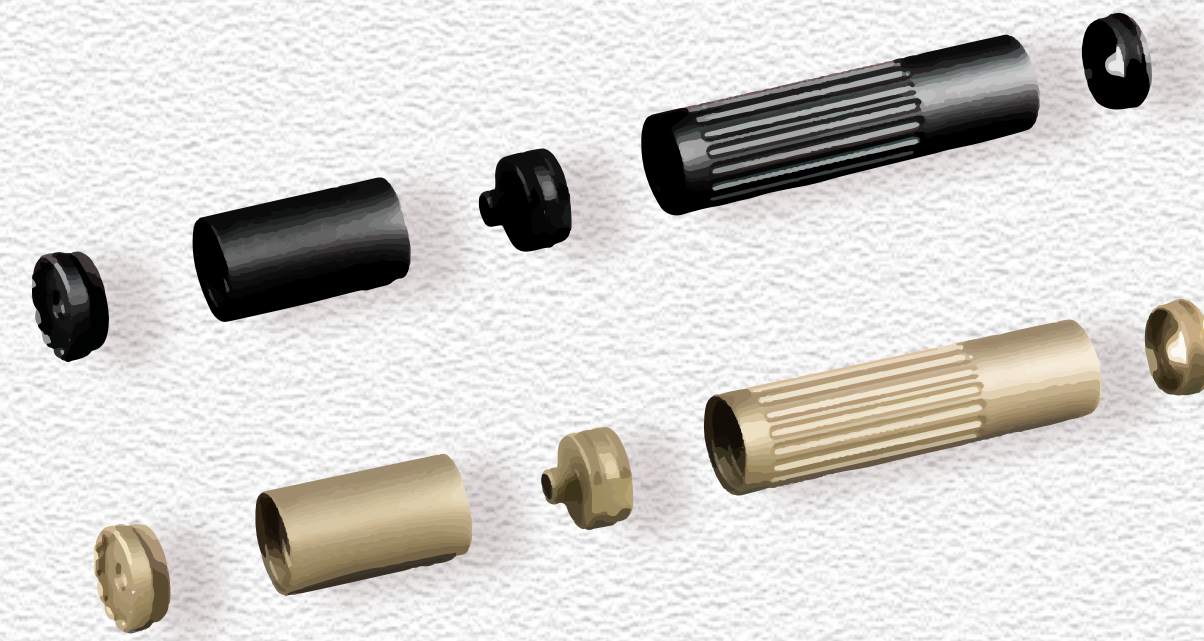

- Without suppressor: Avg. 112.9 dB to be high.
- Short tube suppressor with 6 foam sections: Avg. 108.3 dB to be quieter.
- Long tube suppressor with 14 foam sections: Avg. 89.3 dB to be even quieter.

---

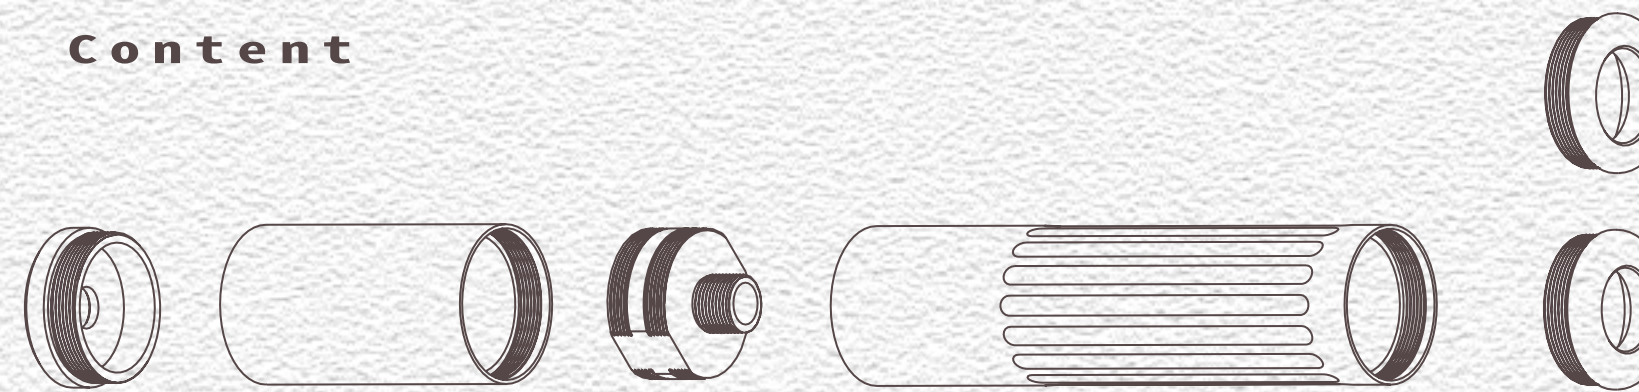

### Design Features

- Easy interchangeability of over-barrel suppressor
- CNC machined aluminum alloy
- Durable and lightweight construction
- Covers and protects outer barrel or extended inner barrel to the suppressor
- Available with a built-in tracer (<28mm dia.)
- 14 mm inside thread of CCW and 14 mm external threads of CCW of the adaptor
- Black/Tan anodized coating and sandblasted
- The foam rings are sound-studio quality
- For airsoft only (won't work on real firearms)

**Content**

front cap, short tube, adaptor, long tube, rear end cap (x2 size).

The OBserver Mock Suppressor is a bi-sectional suppressor or silencer that can be installed in various ways. The front and rear sections can rotate independently and be interchanged. The rear section can cover the outer barrel, with the front section integrated with foam to suppress sound. The inner barrel can be extended through the suppressor to be masked for improved appearance. Or the rear section can be integrated with foam and the front section mounted with tracer.

Overall length	231 mm
Weight	194g
Over-Barrel length	160 mm (max.)
Outer dia.	38 mm
Inner dia.	33 mm
Thread"	14 CCW
Foam sections	
Long barrel	14 pcs
