

ALPHA-MALE OF CARBINES

XTC-G1 XTREME TACTICAL CARBINE

Aerodynamic features life-like detailing beyond comparison.
OE caliber with upgraded quality to dominate the field.

REPLACE YOUR TOY WITH AN AEG MADE FOR ACTION

It's time to fire.

The XTC Xtreme Tactical Carbine is fabricated with 50-year watchmaking expertise and technology to boost confidence in any airsoft AEG hobbyist knowing it will never disappoint on the field.

Replace your AEG for any of one of six reasons:

1. The AEG is down due to stripped gear after a few outings.
2. Other AEGs shoot BBs farther at the same muzzle velocity with tighter groupings. But you need to spend big to upgrade.
3. You need to replace the spring to achieve faster muzzle velocity, which requires dismantling upper and lower bodies, stock and stock tube, or gearbox. Big hassle!
4. The AEG is too slow to switch shooting mode, especially if you're left-handed.
5. You fear running out of ammo, but are tired of having to pack too many magazines at each outing.
6. You see too many other shooters carrying the same M4.
